This book explores the contemporary phenomenon of forced marriage and 'honour' killings in Britain. Set against a background of increasing 'honour'-based violence within the country's South Asian and Muslim Diasporas, the book traces the development of the 'honour' question over the past two decades. It accordingly witnesses unprecedented changes in public awareness and government policy including ground-breaking 'honour'-specific legislation and the criminalisation of forced marriage. All of which makes Britain an important context for the study of this now indigenous and self-perpetuating social problem. In considering the scale of the challenge and its underlying causes, attention is paid to the intersections of gendered power structures that disadvantage female members of 'honour' cultures as well as feminist theories that seek to explain them. The book features five key case-studies of 'honour' killings and draws from a wide range of narratives including those of 'honour' violence survivors, grassroots service providers and legislators. Such myriad of perspectives reveals the complexity of the 'honour' issue and the deep ideological divisions that characterise it. With the UK's multiculturalist discourse unable to reconcile protecting patriarchal minority cultures with safeguarding gender equality and human rights, the book raises fundamental questions about the country's future direction. Following a long trend of state-sponsored integrationist policies, the government's response to the 'honour' question points decisively in the direction of a post-multicultural British nation.

Suspect Families is the first book to investigate the social, political, and ethical implications of parental testing for family reunification in immigration cases. Drawing on policy documents, legal frameworks, case study material and interviews with representatives of governmental and non-governmental organisation and immigration authorities, immigration lawyers, geneticists and applicants for family

reunification, the book analyses the different political regimes and social arrangements in which DNA analysis is adopted for decision-making on family reunification in three distinct European countries: Austria, Finland and Germany. Interdisciplinary in scope, the book reconstructs the processes, institutional logic and the political and administrative practices of DNA testing from a comparative perspective, combining theoretical conceptualisation with detailed empirical work to explore the central societal, political and ethical issues raised by the use of DNA profiling in the context of immigration policy. A ground-breaking study of the role played by new technologies in migration decisions, *Suspect Families* will appeal to scholars of sociology, political science, science and technology studies and surveillance studies.

In this book, it is explained that despite a current drop in the number of deaths, terrorism should still be considered a serious and widespread problem. However, the responses to this phenomenon are often more problematic from a long-term perspective. With the human rights framework under serious pressure, this edited volume offers a timely, important and critical in-depth analysis of human dignity and human security challenges in the lead-up, and in the responses, to current forms of terrorism. It aims to map how human dignity and human security can be secured and how law can constitute a source of trust at a time when Europe and the rest of the world continue to be plagued by terrorism. The authors are both established names and upcoming talent in this fastchanging and exciting field of law. They thoroughly analyse a variety of topical subjects, in more conceptual chapters—for example calling for the humanisation of the security discourse—and in highly practical contributions, in which for instance the Kafkaesque situation in which rendition and torture victim Abu Zubaydah still finds himself today is considered. This book, which focuses on, but is not limited to the situation in Western countries, aims to inspire not only academics—through further theorisation on the sometimes elusive but important concepts of human dignity and human security—but also practitioners working in the field of countering terrorism. It will hopefully convince them (even more) that following a human rights approach will be indispensable in securing human dignity and human security for all. Even—or in fact: especially—in times of terrorism. Christophe Paulussen is a Senior Researcher in the Research Department of the T.M.C. Asser Instituut in The Hague, The Netherlands and Martin Scheinin is Professor of International Law and Human Rights in the Department of Law of the European University Institute (EUI) in Florence, Italy.

This book, set within a social gerontology and transport behaviour studies paradigm, examines current debates and issues around transport for older people and its relationship to health and wellbeing for individuals and society as a whole.

Thailand was a key ally of the United States after WWII, serving as a bulwark against communism in Southeast Asia and as a base for US troops during the Vietnam War. In return, the US provided it with millions of dollars in military and economic aid, and staunchly supported the country's various despotic regimes. And yet, the twenty-first century has witnessed a striking reversal in Thailand's foreign relations: China, once a sworn enemy, is becoming a valued ally to the military government. In this authoritative modern history, Benjamin Zawacki tells the story of Thailand's changing role in the world order. Featuring major interviews with high ranking sources in Thailand and the US, including deposed prime minister Thaksin Shinawatra, Thailand is a fascinating insight into the inner workings of the Thai elite and their dealings with the US and China.

Combining humor and memorable anecdotes, five famous ecotourist destinations offer a breathtaking backdrop to better understanding climate change. Crossing the far corners of the globe, *Tales of an Ecotourist* showcases travel, from the hot and humid Amazon jungle to the frozen but dry Antarctic, as a simple yet spellbinding lens to better understand the complex issue of climate change. At its core, climate change is an issue few truly understand, in large part due to its dizzying array of scientific, economic, cultural, social, and political variables. Using both keen humor and memorable anecdotes, while weaving respected scientific studies along the way, Mike Gunter Jr. transports the reader to five famous ecodestinations, from the Galapagos Islands to the Great Barrier Reef, revealing firsthand the increasing threats of climate change. Part travelogue, part current events exposé, with a healthy dose of history, ecology, and politics, these tales of ecoadventure tackle such obstacles head on while fleshing out much-needed personal context to perhaps society's greatest threat of all. "Gunter takes us to the far corners of the globe to understand the lived experience of climate change. More than a travelogue, *Tales of an Ecotourist* explains how getting outside—out of our houses, immediate surroundings, and comfort zones—can awaken all of us to the realities and urgency of a warming world. This is a rich, beautifully written, and compelling book." — Paul Wapner, author of *Living Through the End of Nature: The Future of American Environmentalism* "In *Tales of an Ecotourist* Mike Gunter Jr. takes you on a remarkable journey, both figuratively and literally, as he recounts his experiences visiting some of the most amazing places on our planet. As a genuine, true-to-principles ecotourist, he has an important lesson for us: If we are to veer from our current path of global environmental degradation, we will have to come to appreciate firsthand its remarkable wonder and beauty." — Michael E. Mann, coauthor of *The Madhouse Effect: How Climate Change Denial Is Threatening Our Planet, Destroying Our Politics, and Driving Us Crazy*

This book explores the use of foreign judges on courts of constitutional jurisdiction in 9 Pacific states: Fiji, Kiribati, Nauru, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu. We often assume that the judges sitting on domestic courts will be citizens. However across the island states of the Pacific, over three-quarters of all judges are foreign judges who regularly hear cases of constitutional, legal and social importance. This has implications for constitutional adjudication, judicial independence and the representative qualities of judges and judiciaries. Drawing together detailed empirical research, legal analysis and constitutional theory, it traces how foreign judges bring different dimensions of knowledge to bear on adjudication, face distinctive burdens on their independence, and hold only an attenuated connection to the state and its people. It shows how foreign judges have come to be understood as representatives of a transnational profession, with its own transferrable judicial skills and values. *Foreign Judges in the Pacific* sheds light on the widespread but often unarticulated assumptions about the significance of nationality to the functions and qualities of constitutional judges. It shows how the nationality of judges matters, not only for the legitimacy and effectiveness of the Pacific courts that use foreign judges, but for legal and theoretical scholarship on courts and judging.

The British general election of May 2010 delivered the first coalition government since the Second World War. David Cameron and Nick Clegg pledged a 'new politics' with the government taking office in the midst of the worst economic crisis since the 1930s. Five years on, a team of leading experts drawn from academia, the media, Parliament, Whitehall and think tanks assesses this 'coalition effect' across a broad range of policy areas. Adopting the contemporary history approach, this pioneering book addresses academic and policy debates across this whole range of issues. Did the coalition represent the natural 'next step' in party dealignment and the evolution of multi-party politics? Was coalition in practice a historic innovation in itself, or did the essential principles of Britain's uncodified constitution remain untroubled? Fundamentally, was the coalition able to deliver on its promises made in the coalition agreement, and what were the consequences - for the country and the parties - of this union?

The Handbook of Terrorism in the Asia-Pacific provides a historical overview of terrorism in the Asia-Pacific, the evolution of threat, and the present threat faced by countries with the rise of the Islamic State (IS). This is a concise and readable handbook which examines the origins of the current wave of terrorism across countries in Southeast Asia, South Asia, Northeast Asia and the Pacific, and identifies emerging trends and new forms of terror that have altered the landscape and rendered the region increasingly vulnerable to asymmetric attacks. Comprising of more than 20 chapters, this handbook will be a useful source of reference for undergraduate and graduate students focused on understanding the causes of terrorism and insurgency in the Asia-Pacific.

The present annual report covers questions considered by the Security Council and matters brought to its attention as well as the work of the Council's subsidiary bodies during the reporting period of 1 August - 31 July 2015.
