Criminological Theories: Introduction, Evaluation, and ...

The goal of criminological theory is to help one gain an understating of crime and criminal justice. Theories cover the making and the breaking of the law, criminal and deviant behavior, as well as patterns of criminal activity. Individual theories may be either macro or micro. Theories can be used to guide policy making, and can be

Criminological Theories: Introduction, Evaluation, and ...

In Criminological Theories: Introduction, Evaluation, and Application, Eighth Edition, Ronald L. Akers, Christine S. Sellers, and Wesley G. Jennings provide a concise but thorough review and appraisal of the leading theories of crime and criminal justice. Based on the widespread success of the first seven editions, this landmark book keeps current with changes in the development, testing, integration, and application of important criminological theories. Each chapter has been updated and substantially revised in light of recent research and important changes in the theories. More extensive revision and updating have been done on biological and biosocial, psychological, social disorganization, and conflict theories.

In Criminological Theories, the noted criminologist Ronald Akers provides thorough description, discussion, and appraisal of the leading theories of crime/delinquent behavior and law/criminal justice - the origin and history of each theory and its contemporary developments and adherents. Akers offers a clear explanation of each theory (the central concepts and hypotheses of each theory as well as critical criteria for evaluating each theory in terms of its empirical validity). Researchers and librarians, as well as general readers, will find this book a very useful tool and will applaud its clear and understandable exposition of abstract concepts.

Criminology is in a period of much theoretical ferment. Older theories have been revitalized, and newer theories have been set forth. Th e very richness of our thinking about crime, however, leads to questions about the relative merits of these competin paradigms. Accordingly, in this volume advocates of prominent theories are asked to "take stock" of their perspectives. Th eir challenge is to assess the empirical status of their theory and to map out future directions for theoretical development.

Social learning theory has been called the dominant theory of crime and delinquency in the United States, yet it is often misrepresented. This latest volume in the distinguished Advances in Criminological Theory series explores the impact of this theory. Some equate it with differential association theory. Others depict it as little more than a micro-level appendage to cultural deviance theories. There have been earlier attempts to clarify the theory's unique features in comparison to other theories, and others have applied it to broader issues. These efforts are extended in this volume, which focuses on developing, applying, and testing the theory on a variety of criminal and delinquent behavior. It applies the theory to treatment and prevention, moving social learning into a global context for the twenty-first century. This comprehensive volume includes the latest work, tests, and theoretical advances in social learning theory and will be particularly helpful to criminologists, sociologists, and psychologists. It may also be of interest to those concerned with current issues relating to delinquency, drug use/abuse, and drinking/alcohol abuse.

The social learning theory of crime integrates Edwin H. Sutherland's differential association theory with behavioral learning theory. It is a widely accepted and applied approaches to criminal and deviant behavior. However, it is also widely misinterpreted, misstated, and misapplied. This is the first single volume, in-depth, authoritative discussion of the background, concepts, development, modifications, and empirical tests of social learning theory. Akers begins with a personal account of Sutherland's involvement in criminology and the origins of his influential perspective. He then traces the intellectual history of Sutherland's theory as well as social learning theory, providing a comprehensive explanation of how each theory approaches illegal behavior. Akers reviews research on various correlates and predictors of crime and delinquency that may be used as operational measures of differential association, reinforcement, and other social learning concepts. Akers proposes a new, integrated theory of social learning and social structure that links group differences in crime to individual conduct. He concludes with a cogent discussion of the implications of social learning theory for criminology and public policy. Now available in paperback, with a new introduction by the author, this volume will be invaluable to professionals and for use in courses in criminology and deviance.

Criminological Theory: The Essentials, Third Edition offers you a brief yet comprehensive overview of classic and contemporary criminologists and their theories. Putting criminological theory in context, acclaimed author Stephen G. Tibbetts examines policy implications brought about by theoretical perspectives to demonstrate to you the practical application of theories to contemporary social problems. New to the Third Edition: A new chapter dedicated entirely to feminist perspectives (Chapter 10) introduces you to feminist models of crime while underscoring the importance of examining the related research. Case studies that examine offender motives are now included to help you apply the theories discussed to interesting and memorable examples. Policy is now integrated into each section to allow you to see the practical policy implications of each theory. Coverage of critical topics has been expanded throughout to introduce you to important issues, such as the influence of employment on criminal behavior, the success of school programs in reducing delinquent behavior, and federal sentencing guidelines in regard to crack versus powder cocaine. Statistics, graphs, and tables have all been updated to demonstrate the most recent trends in criminology.
