Short General Health Questionnaire (GHQ 12)

The items of the GHQ 12 were selected from the pool of 60 items comprising the original questionnaire, GHQ 60. Items focus on the inability to carry out normal activities and the appearance of new and distressing symptoms, i.e., depression, anxiety, observable behaviors, and hypochondriasis.

GHQ - General Health Questionnaire

In the GHQ-12 group, 90 and in the GHQ-28 group, 80 subjects filled in the questionnaires and agreed to participate in the second stage of the study--a psychiatric interview. The criterion validity of the GHQs was a mental health diagnosis, based on the Munich version of Composite International Diagnostic Interview.

(GHQ) Developed in the 1970s, the General Health Questionnaire is a method to quantify the risk of developing psychiatric disorders. This instrument targets two areas – the inability to carry out normal functions and the appearance of distress – to assess well-being in a person. The format of the full GHQ is 60-item test with a four-point scale for each response.

General Health Questionnaire (GHQ) - Statistics Solutions
The 12-item General Health Questionnaire (GHQ-12) has been widely used in many settings and languages, and includes positively and negatively worded items. Our aim was to test the hypothesis that the GHQ-12

The General Health Questionnaire (GHQ) is a psychometric screening tool to identify common psychiatric conditions. It has been translated and validated in at least two languages in addition to English, including Spanish and Persian. The questionnaire comprises a number of questions, each with a four-point Likert scale for responses. There are versions with 12, 28, 30 and 60 questions.
