A fascinating exploration of the relationship between American culture and music as defined by musicians, scholars, and critics from around the world.

Neil Atherton is an English folk musician now living in Hong Kong, having moved there after his wife accepted an attractive job offer. Unemployed for six months, Atherton meets Elbert Chan, a travel agent and part-time impresario. Neil accepts Elbert's offer of a career as a Neil Diamond impersonator.

"This book observes images of Montenegro in Anglo-American creative writing and films from the late eighteenth century until 2016. Like the Balkans as a whole, Montenegro usually reappeared in the West's consciousness with the outbreak of wars, but remained marginalized on the larger Balkan map because of its peripheral political influence and, therefore, remained little known. In the past, Montenegro was experienced as almost unapproachable, barren, and wild. Its people, like their mountains, were seen as massive and fierce, while their primitivism equally delighted and repulsed visitors. Even today, when one searches the Internet for "Montenegro,"

one finds titles mostly containing modifiers circling around "undiscovered," "magical," and "mysterious." The book follows these vignettes chronologically to point out how the rhetoric they share dangerously builds a caricature of the country. However, they also provide a very lively mosaic of landscapes, history, people, their costumes, houses, and everyday life, which are sometimes distorted. No one can claim that these descriptions were not influenced by the ideologies the travellers inherited at home and were not filtered through their own cultural grids, but, significantly, they evoke places that are now forever lost - destroyed in wars, by earthquakes, faulty development planning, or, simply, by time.

While Christopher Columbus's legacy may be controversial, the wave of global transformation that came after him is undeniable. After 1492, the world was irrevocably headed down a path where people, plants, animals, and even microbes, would never be the same. Readers will make insightful connections between Columbus's journey and the forces at play in their own world through project-based learning, featuring colorful photographs and special sidebars. With special care to better examine the Native American perspective, the narrative provides insight to the world that Columbus stumbled upon, not discovered.

coverage. They provide in-depth discussion of various culture areas which, while valuable, sometimes means that the big picture context is lost. This book offers a corrective to that trend by providing a concise, thematic overview of the key issues facing Indigenous peoples in North America, from prehistory to the present. It integrates a culture area analysis within a thematic approach, covering archaeology, traditional lifeways, the colonial era, and contemporary Indigenous culture. Muckle also explores the history of the relationship between Indigenous peoples and anthropologists with rigor and honesty. The result is a remarkably comprehensive book that provides a strong grounding for understanding Indigenous cultures in North America.

Argues that popular films perform a religious function in our culture The first edition of *Film as Religion* was one of the first texts to develop a framework for the analysis of the religious function of films for audiences. Like more formal religious institutions, films can provide us with ways to view the world and the values to confront it. Lyden argues that the cultural influence of films is analogous to that of religions, so that films can be understood as representing a “religious” worldview in their own right. Thoroughly updating his examples, Lyden examines a range of film genres and individual films, from *The Godfather* to *The Hunger Games* to *Frozen*, to show how film can function religiously.
