Voices of Determination tells the stories of ten children who overcame extraordinarily difficult circumstances to get an education and end the cycle of generational poverty. It debunks the myth that children are victims of circumstance. In this moving work, Kevin P. Chavous argues that children can and will succeed if the educational system provides them with the opportunity to learn. Many of these narratives depict public schools at their worst. Chavous argues that poor communities routinely hire inexperienced teachers, lack resources, and pass kids along until they drop out. Once out of school, these youngsters quickly find out that they are unprepared for the job market. This, he claims, leads many young people to drift into anti-social behavior and turn to gangs, drugs, and unproductive lifestyles. In addition the narratives in this volume also address such social issues as immigration, bad neighborhoods, poor health care, addiction, and child abuse. Chavous highlights how hope for a better future enabled the children whose stories make up this volume to achieve a better life. There are potential challenges at every stage of a child's development and the adults around them need to be nearby and ready to act effectively. Chavous concludes that the need to strengthen families and to rebuild surrounding communities should be the top priorities for society as a whole.

Mathematics for Elementary School Teachers is designed to give you a profound understanding of the mathematical content that you are expected to know and be able to teach. The chapters integrate the National Council of Teachers of Mathematics (NCTM) Standards and Expectations and the new Common Core State Standards, as well as research literature. The five NCTM Process Standards of problem solving, reasoning and proof, communication, connections, and representation highlight ways that teachers present content, the ways that students learn content, and various ways that students can demonstrate procedural and conceptual understanding. The worked examples and homework questions provide prospective elementary school teachers with opportunities to develop mathematical knowledge, understanding, and skills that they can apply in their own classrooms effectively. The learning path begins with the Where Are We Going? Chapter Openers, worked Examples with Yellow Markers that indicate the Process Standards throughout the text, to the Concept Maps, to the Section Question Sets with their refreshers of Process Standards, to the Chapter Organizers with Learning Outcomes and a list of the corresponding Review Questions, and finally, conclude at the Chapter Tests with their overarching Learning Outcomes.
