The Principles of Product Development Flow: Chapter 1

Product principles are the core DNA of the product.

They ' re the fundamental values that underly every action, decision or move the product team makes. Much like a North Star metric, every choice can be checked against the product principles. This ensures it stays in line with the values the product team is trying to embrace and maintain.

How to Define Your Product Principles | ProductPlan

Lean development is the application of Lean principles to software development. Lean principles got their start in manufacturing, as a way to optimize the production line to minimize waste and maximize value to the customer. These two goals are also relevant to software development, which
